

Adil BASRI

FRONTEND ENGINEER

Passionate, creative and solutions-oriented front-end developer

🐙 adevinwild 🌐 imadil.dev

FRONTEND SKILLS

- HTML / CSS / SASS / Tailwind CSS
- JavaScript / TypeScript
- jQuery / React / Next.js / Astro / Remix
- Redux / Zustand / Recoil
- Tanstack Query
- Storybook / Jest / Cypress
- Wagmi / Ethers / Viem / Rainbow Kit
- D3.js / visx

BACKEND SKILLS

- Node.js / Express.js / Nest.js / Next.js
- MySQL / PostgreSQL / MongoDB / Supabase
- Redis / BullMQ
- TypeORM / Prisma / Drizzle
- REST API / tRPC

OTHER SKILLS

- Docker
- GitHub Actions
- Git

DIPLOMAS

Web Developer EQF 5
 AFPA - Marseilles , France
 Obtained in 2021

Vocational Baccalaureate Digital Electronic Systems
 EME - Marseilles , France
 Obtained in 2016

EXPERIENCES

Frontend engineer

Wagmi Studio - Full Remote

From November 2023 to April 2024
 End of contract for economical reasons

- Development of back offices and landing pages for major groups such as: ICRC (French Red Cross) or La Poste
- Development of NFT purchase websites with wallet connection and credit card payment, in close collaboration with back-end developers

Software Engineer Geolocation SDK

Corellis / Michelin - Full Remote

From July 2023 to October 2023
 Freelance contract

- Launch the project in compliance with the technological choices and tools specified in the technical specifications.
- Use of Webpack for the bundling phase and optimized resource management, helping to improve overall SDK performance.
- Integration of JSDoc to provide comprehensive documentation, improving the developer experience
- Essential SDK features built in JavaScript, guaranteeing compatibility with different platforms (server and browser).
- Design and execution of thorough unit and integration tests, guaranteeing SDK reliability and stability in various scenarios.
- Building of a React.js and Angular wrapper for the SDK, enabling developers to easily integrate it into their projects.
- Integration of semantic-release, for versioning automation and change-logs

Fullstack Engineer

Ortros - (70% remote) France

From December 2022 to November 2023

- Develop reliable and scalable back-end systems using cutting-edge technologies such as Express.js, TypeScript, and Awilix, tailored to the unique needs of various agency clients (e.g., Marketplace, CRM).
- Craft visually appealing and user-friendly interfaces using Next.js 13, leveraging the power of TailwindCSS for seamless styling, and ensuring thorough testing with Cypress for a polished user experience (e.g., Storefront, Mobile App with React Native).
- Implement efficient deployment pipelines utilizing GitHub Actions to ensure the timely and reliable delivery of these innovative solutions.

Frontend engineer

HumanFab - Aix-en-Provence, France

From July 2021 to December 2022

- Enhancement and maintenance of existing codebase, including jQuery, HTML and CSS Integration and deployment of micro-frontend architecture using React.js
- Designing and prototyping user interfaces for Desktop and Mobile with Figma Development of a coherent, effective design system and UI library in close collaboration with web designers
- Creation and development of the new HumanFab WorkCare solution, using Next.JS and TypeScript
- Development of a CLI to optimize the DX of all the team members and facilitate production release
- Build new endpoints with .NET C# using an internal ORM
